

Pollinator's Path Scavenger Hunt

Welcome to the Hive, Brave Pollinators!

Spring has returned, and the hive is alive with excitement! Flowers are beginning to bloom, filling the air with color and fragrance, but the season is off to a rocky start. A magical nectar, known as the **Golden Bloom**, has been scattered across the Triangle, hidden deep within the gardens.

You are one of the hive's finest pollinators, tasked with embarking on a daring journey to recover the lost nectar. Along the way, **you'll visit five beautiful nurseries**, each holding a piece of the nectar's magic. Solve clues, follow the trail, and restore balance to the gardens.

Feeling extra ambitious? A fabulous **sixth garden holds an additional challenge**. Complete it, and you'll **earn an extra entry into the hive's grand raffle**. The survival of spring depends on your success. Now, spread your wings, and let's fly!

1. Choose your own flight path! **Visit any of the five (and optional sixth) participating nurseries** to find their hidden clues.

2. Clues will be placed in **public, accessible areas**. Look carefully among the plants and displays. There's **no need to disturb anything or ask the staff for help**.

3. When you find each clue, **take a picture of it!** (Your face doesn't need to be in the photo.)

4. Find and **photograph all five main clues** to earn **one entry** into the hive's grand raffle.

5. Bonus nursery: Visit the **bonus location, Garden Treasures**, to solve an extra clue and **earn an additional raffle entry!**

6. **Be kind** to plants, displays, other guests, and nursery staff. Stay in public areas and enjoy the beauty of each nursery.

7. **Submit your photos to enter the raffle**. Once you've completed your journey, send your photos to NRSLehunt@gmail.com **before May 5th at 5pm**.

8. Explore at your own pace, breathe in the spring air, and have fun along the way!
